ROOFTILE AUTOFEED SCREWS

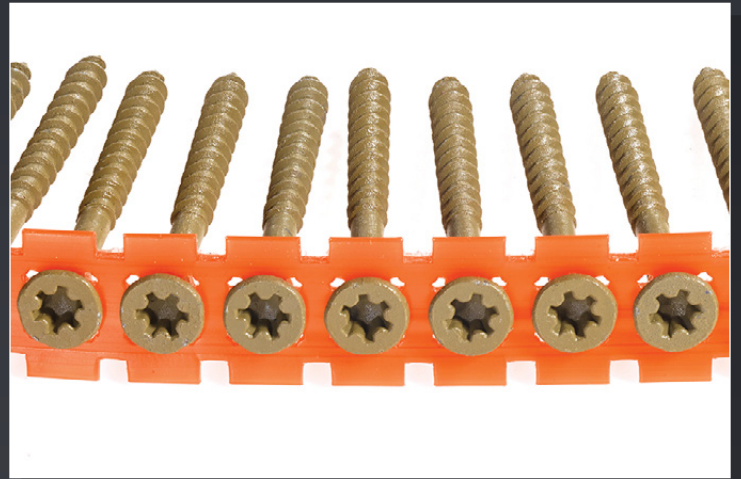

BY **FastenMaster**

Install Smarter. Fasten Stronger.

Eagle has partnered with FastenMaster to bring you RoofTile AutoFeed Screws, a premium fastening solution designed specifically for concrete tile roofing.

Paired with the PAMFast AutoFeed Screw System, RoofTile AutoFeed Screws help contractors install tile roofs faster, easier, and more accurately. The system's consistent drive depth helps reduce costly material damage caused by over-driven and under-driven screws, providing greater confidence in every installation.

Built for lasting performance, RoofTile AutoFeed Screws deliver a secure, watertight roof system with the strength to withstand years of wind, weather, and exposure.

Features & Benefits

- Available in 2 1/2"
- 40% more screws per fastener belt than average
- Made with PAMDrive recess preventing bit grinding and cam-outs during installation
- COPPERHEAD™ Coating provides durable, anti-corrosive finish
- Threaded design provides stronger resistance against pull-out forces, reducing tile slippage and loosening over time
- Approved for both the corded and cordless PAMFast Autofeed Screw Gun
- Consistent premium installation and efficient job performance due to repeatability and ease of use
- More screws per belt means more time driving, less time reloading
- Reduces the risk of damaging roof tiles
- Exceptional holding power and superior wind uplift resistance
- No back out means no leaks
- Resilient, more affordable alternative to stainless steel screws
- Miami-Dade Certified for corrosion resistance

ROOFTILE AUTOFEED SCREWS

BY **FastenMaster**

Better Depth • Better Alignment • Better Protection

FastenMaster
PAMFast™
AutoFeed Screw System

RoofTile AutoFeed Screws* are designed for—and approved to work with—the PAMFast AutoFeed Screw System**. Its smooth-advancement technology delivers a clean, consistent drive while eliminating jams, rejections, and issues like over-driving or under-driving.

Featuring a durable metal feed mechanism that outperforms plastic alternatives, the system advances our RoofTile AutoFeed Screws on the downward stroke to prevent double-feeds, while precise depth control delivers consistent fastener placement to reduce stress on tiles.

The result? A concrete tile roof installation you can be proud of: no broken tiles, no potential leaks, and reliable long-term performance built on strength, stability, proper water shedding, and resistance to high winds.

Critical Dimensions and Design Features

Eagle Stock Number	8310
Wire Gauge	#8
Overall Length	2.50"
Thread Length	1.67"
Thread Diameter	0.177"
Threads Per Inch	8.0
Head Diameter	0.325"
Drive Type	Patented 12 point (6-Lobe)
Coating	Epoxy E-Coat over Zinc Electroplate

*RoofTile AutoFeed Screws is a product of Eagle Roofing Products "Secure Roof Components" line. This product is a collaboration with Eagle Roofing Products and FastenMaster, a division of OMG, Inc. **The PAMFast AutoFeed Screw System is sold separately and is available both in corded and cordless models.
