COMPONENTS™**  
by Eagle Roofing Products

# UNIVERSAL TILE RIDGE VENT<sup>BY</sup> MARCO INDUSTRIES™

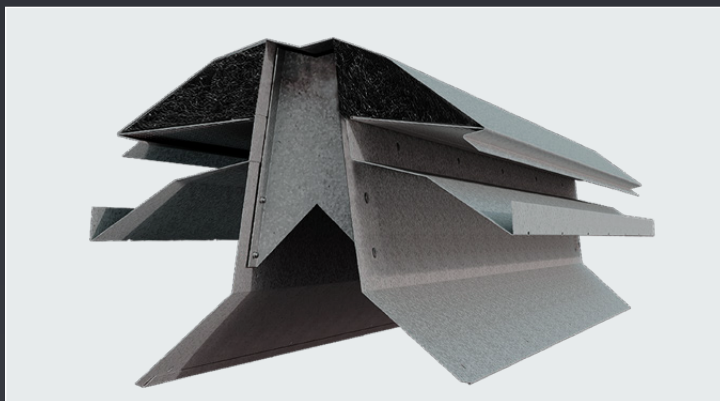

***Cooler Attics. Lower Energy Costs. Greater Peace of Mind.***

*Eagle has partnered with Marco Industries to bring you an industry first Universal Tile Ridge Vent.*

Offering superior attic ventilation, effortless installation, and robust roof-system protection, **Universal Tile Ridge Vent** is the gold standard for exhausts on Eagle tile roofs. Installed along the peak and spanning the full length of the roof, these vents boost airflow and allow the hottest, most moisture-laden air to escape.

In addition to reducing the strain on your air-conditioning system, they feature a perforated barrier and Weather-Tite nonwoven baffle that work together to create a powerful multi-layer defense. The result is exceptional protection against wind-driven rain, dust, animals, and debris—while still allowing air to flow freely.

**Universal Tile Ridge Vents** are an investment in your home's structural integrity, energy efficiency and everyday comfort.

## Features

- Available in 5" and 6" heights - 4' foot length
- Made from high quality, resilient 26-gauge galvalume steel
- 20 square inches of Net Free Venting Area per lineal foot, totals 80 square inches per vent
- Pop rivets provide superior durability
- No ridge board or separate brackets required for easy installation
- Suitable for any roof pitch from 3/12 to 12/12

## Benefits

- Removes trapped heat and moisture buildup
- Reduces strain on HVAC system and lowers energy costs
- Zero water infiltration means NO leaks, wood rot or mold
- Keeps animals, insects and debris out
- Extends the efficiency and performance of your entire roof system
- Blends in with the roofline for a clean, uniform look
- TAS-100 approved, meeting stringent hurricane testing requirements

***Give your roof system the protection it deserves. Choose Universal Tile Ridge Vents for superior airflow, durability and long-term performance.***

## Protect What Matters with Proper Attic Ventilation.

**Universal Tile Ridge Vents** are a simple yet powerful solution that will protect your home year-round and reduce energy costs. By promoting continuous airflow through the attic, they help prevent the buildup of excess heat and moisture that can contribute to mold and mildew growth, wood rot, and premature roof deterioration. Their durable design effectively helps keep out wind-driven rain, insects, pests and debris while requiring minimal maintenance.

LEAK PROTECTION

PROTECT FAMILY HEALTH
