INDUSTRIES™**

Superior Kitchen & Bathroom Ventilation Starts Here

Eagle has partnered with Marco Industries to bring you the only wind-driven rain tested Gooseneck Vent of its kind.

Safely and effectively exhaust air, moisture and gasses produced by kitchen and bathrooms with **Tile Gooseneck Vents**. Built to perform in demanding environments, its sleek, curved shape promotes superior airflow, ensuring consistent, reliable ventilation that protects the home from trapped humidity and stale air.

It also keeps water out. The **Tile Gooseneck Vent's** leak-resistant design blocks wind-driven rain from entering the attic, helping reduce the risk of wood rot, mold growth, and premature roof deterioration. The result is a more resilient roof system and lasting peace of mind.

Features

- Available in high and low profile – 4", 6" and 10"
- Offered in a variety of finishes upon request
- Made from high quality, resilient 26-gauge galvalume steel
- Suitable for tile roofs, as well as synthetic, cedar, shake, and slate
- Pop rivets provide superior durability
- Suitable for any roof pitch from 3/12 to 12/12
- Design keeps insects and animals out of attic

Benefits

- Superior airflow eliminates moisture buildup—stopping mold, mildew, and asthma triggers
- Reduces strain on HVAC system and lowers utility costs
- Zero water infiltration means no leaks, no wood rot
- Durable design significantly reduces customer call-backs
- No noisy damper, even through wind and rain
- TAS-100 approved, meeting stringent 100mph wind-driven rain test
- Meets Energy Star color requirements

LEAK PROTECTION

TILE GOOSENECK VENT

BY
**MARCO
INDUSTRIES™**

Protect Your Attic. Preserve Your Roof.

Tile Gooseneck Vents are essential for a healthy home. Their unique curved design locks out wind, rain, and destructive pests. Beyond exhausting air, they are a critical part of a balanced, whole-roof ventilation system that actively prevents indoor condensation. By stopping moisture buildup before it starts, they safely protect your family from the mold, mildew, and respiratory triggers that cause asthma attacks.

- Effectively blocks water from getting in
- Stops insects, birds, and rodents from climbing down the exhaust pipe
- Provides unrestricted path for trapped heat and moisture so it doesn't build up in the attic
- Helps extend the life of your roof

Dimensions and Design Features

Dimensions	Width 19-3/16" x Height 10-1/4"		
Material	26 gauge galvalume	* Vent Hood	Mini louvers in lower portion of hood block water
