

Advanced Ventilation. Proven Protection.

Eagle has partnered with Marco Industries to bring you an innovative Tile-Off Ridge Vent that outperforms all others.

Installed just below the roof peak where hot spots are most likely to occur, **Tile-Off Ridge Vents** exhaust trapped heat, humidity, and moisture to promote continuous airflow throughout the attic space. Delivering ample ventilation with **100 square inches of Net Free Venting Area per 4-foot unit**, they play a critical role in reducing the risk of mold, mildew, and premature deterioration while supporting a more energy-efficient roof system.

The sleek, aerodynamic profile of the **Tile-Off Ridge Vent** reduces wind uplift and provides exceptional protection against water intrusion, even during wind-driven rain at speeds up to 110 mph. Its design also allows for longer continuous vent sections, streamlining installation and saving contractors time by reducing the number of individual openings and placement decisions—without compromising performance.

Features

- Available in both high and low profiles - 4' foot length
- Multiple colors available and can be painted
- Made from high quality, resilient 26-gauge galvalume steel
- 25 square inches of Net Free Venting Area per lineal foot, totals 100 square inches per vent
- Higher lift makes it suitable for tile roofs, as well as synthetic, cedar, shake, and slate
- Pop rivets provide superior durability
- Suitable for any roof pitch from 3/12 to 12/12
- Design keeps insects and animals out of attic

Benefits

- Reduces air conditioning maintenance and utility costs
- Zero water infiltration means no leaks, no wood rot
- Clean, elegant, aesthetically pleasing look
- Saves contractors time and money - no additional external baffle required
- Durable design significantly reduces customer call-backs
- Meets Energy Star color requirements
- No noisy damper, even through wind and rain

Choose Tile Off-Ridge Vents for a stronger, better-ventilated roof system built to last.

Proper Ventilation Protects Your Home from the Inside Out

Tile-Off Ridge Vents provide greater peace of mind, fewer maintenance concerns, and long-term protection for the entire roofing system.

Why It Matters

Protect Your Family's Health

Superior airflow helps reduce mold-related risks—including asthma triggers—while improving overall indoor air quality.

Lower Energy Waste

Trapped heat and moisture is released, helping your AC run more efficiently and saving homeowners money.

Leak-Proof Protection in Extreme Weather

Built to withstand harsh storms, these vents block wind-driven rain and minimize wind uplift for long-lasting, leak-free roof protection.

Added Defense

A specially engineered design allows for proper airflow while keeping insects, rodents, birds, and other unwanted intruders out.

Costs of Improper Ventilation

- ✗ Excessive Attic Heat Build-up
- ✗ Premature Roof Deterioration
- ✗ Higher Energy Use, Higher Utility Bills
- ✗ Reduced Roof Performance
- ✗ Moisture Damage, Wet Insulation, Wood Rot
- ✗ Airborne Mold & Mildew Risks
- ✗ Entry Point for Insects & Animals
- ✗ Increased Risk of Ice Dams in Cold Climates
- ✗ Costly Repairs & Insurance Headaches

Dimensions and Design Features

Eagle Stock Numbers	8272 —4' Tile Low Profile; 8274 —4' Tile High Profile		
Dimensions	Width 23 1/2" - x Height 6"	Net Free Area	25 sq. in. per Lineal ft
Material	26 - gauge galvalume	Screws	13/4" Wood Type for Bottom Flange (Not included)
Codes & Standards	Passed TAS 100; Approved for HVHZ	Vent Hood	Mini louvers in lower portion of hood block water.
Roof Pitch	Conforms to any pitch from 3/12" to 12/12"	Interior Louver Panel	Mini louvers in opposite direction to louvers on lower portion of hood as second water barrier
Color	Black, Weatherwood, Mill	Internal Baffle	Placed at the top of the vent pan, the internal baffle is the third line of defense against water intrusion.
Nominal Lengths	4'		

**Tile Off-Ridge Vents are a product of Eagle Roofing Products "Secure Roof Components" line. This product is a collaboration with Eagle Roofing Products and Marco Industries and comes with a 25-year pro-rated manufacturer warranty.*
